

Memorandum

12 December 2022

Rejection of Karpowerships

Addressed to

Mrs Hantie Plomp and Associated Colleagues of Triplo4

Karpower Middle East and North Africa

Regional Manager

Yasin El Suudi

Karpower Chief Executive Officer

Orhan Remzi Karadeniz

Today we are gathered here as members of the West Coast, in Solidarity with communities of the Eastern Cape, and Kwazulu Natal. The West coast communities and friends here are united against the Kapowership project that we believe will neither bring any jobs or affordable so called emergency power they claimed. Climate crisis is real and the climate crises is here, we demand renewable energy now, not a Gas ship in our waters that will fuel the climate crisis. We will not allow our oceans at be risk of blasts, leaks, and explosions. in our view, Karpowership is not the answer to load shedding. Karpower has had a number of controversies and we believe that this round 2 EIA is still flawed and should be refused.

Today members of the Khoi San from Chochoqua Kingdom from Saldanha ,Red dust Action group, Fishers,Coastal Links,Langebaan Patrentoster,St

Helena , Saldanaha, Masifundise, South African Fishers Collective , One ocean Hub , Save the Langebaan lagoon , Aukotowa Fisher Port Nolloth, Green connection, 350.org, Eastern Cape environmental Network and , South Durban Community Environmental Alliance from KZN say no to Karpower.

We believe:

- We oppose this skewed form of Development known as Karpowership .
- the EIA Application should not be granted
- Fishers were not consulted meaningfully Triplo4 as the consultants have been asked to speak to small scale fishers yet they appear to be biased and ignore fishers leaders and speak to small business groups who are in support of their Project meeting.

- West Coast Fish is at risk
- The breeding zones is at risk
- Small scale fishers are risk
- Banks investing in karpowership should put their money into cleaner energies not Powerships
- Karpowerships is a false solution to energy crisis
- NO to a 20year Gas ship
- NO to Noisy Ship in our waters
- No to oil companies like SHELL getting more business (To Hell with Shell)
- No Pipelines in our waters
- No Waste water in our harbor already full of red Dust

WE will stand up for our Right to clean and healthy oceans. WE will make our voices heard for the right to healthy Food. We will Not allow this Turkish company to put us at risk of climate change ecocide

Antonio Guterres Secretary General of the United Nations “To invest in new Fossil fuels is a moral and economic madness.”
