

BEACH CLOSED!?

#StopTEEPSA

TOTALENERGIES: STOP DESTROYING THE OCEAN & THE CLIMATE!

IMAGINE IF YOU CAME TO THE BEACH & IT WAS CLOSED DUE TO OIL SPILL OR GAS EXPLOSION?

NO ICE CREAM SHOP?

NO SWIMMING/SURFING?

NO TANNING?

NO CHILLAZ?

NO VOLLEYBALL?

NO BEACH PARTY?

NO PENGUINS AND FISH?

NO BOAT RIDE?

TotalEnergies Exploration and Production South Africa (TEEPSA) plans to drill oil and gas in South African in South Africa's ocean, in areas of rich marine biodiversity, at the expense of wildlife and of small-scale fishers' livelihoods. Beach visitors, coastal communities and civil society organizations advocate to stop such explorations to protect the environment, their livelihoods and heritage. The Green Connection, as part of the Who Stole Our Oceans campaign, works with coastal communities to preserve cultural heritage, fishing livelihoods and marine life.

Is our beach at risk? Yes. At risk to oil and gas destruction. We need to protect and preserve marine life and call for sustainable economic development.

What can you do?

Sign the petition to call for protection of endangered marine species and stop offshore oil and gas exploration.
